PROJECTS

Team Task Manager | *MERN Stack, JWT Auth, REST APIs, MongoDB*

[GitHub](#)

- Engineered a real-time collaborative task management platform enabling teams to create, assign, track, and update tasks with **role-based access control**.
- Implemented secure authentication and authorization using **JWT**, supporting multi-user workflows and protected dashboard access.
- Developed dynamic task pipelines with **CRUD operations**, deadline tracking, priority tagging, and status management to streamline team productivity.
- Integrated **REST APIs** with **MongoDB** for efficient real-time data handling, ensuring seamless synchronization of **100+ concurrent task updates**.

NyaySetu | *MERN Stack, Google Gemini AI, Google Places API, Indian Kanoon API*

- Developed a full-stack legal-tech platform to bridge the accessibility gap between Indian citizens and the justice system, focusing on legal literacy and advocate networking.
- Integrated **Google Gemini AI** to simplify complex legal jargon into plain language, providing users with instant, understandable summaries of Indian statutes.
- Engineered a real-time **Lawyer Specialist Directory** via **Google Places API**, allowing users to filter and locate verified legal professionals based on geolocation and specialty.
- Implemented a **Hybrid Search Engine** connecting to the **Indian Kanoon API**, enabling sub-second retrieval of real-time case laws and historical judgments.
